

# Construction Alert

## LAGUNA CANYON CHANNEL REPLACEMENT PROJECT

Project Rendering

In February 2019, approximately 265 feet of the flood control channel wall collapsed during heavy rain storms and pressure caused by adjacent tree roots. A temporary repair project was implemented to fix the collapsed wall and install bracing within the channel to prevent additional damage. This upcoming project will replace the temporary repairs with a permanent solution for the channel and ensure continued flood protection for the surrounding community.

### WHAT

Crews will:

- Use large equipment to remove and replace the rectangular concrete channel and reconfigure the concrete pedestrian bridges that cross over the channel
- Replace landscaping and hardscaping (in coordination with the City of Laguna Beach)
- Remove trees that may pose a risk to the channel

#### Parking along Laguna Canyon Frontage Road:

Approximately two-thirds of parking spaces along Laguna Canyon Frontage Road will be open for adjacent businesses during each phase of construction, while **a portion of parking spaces will be temporarily closed** to accommodate this work and equipment.

#### Pedestrian sidewalk along Laguna Canyon Road:

While the sidewalk near the project area will be closed during construction, a temporary pedestrian walkway with protective barrier will be available. **Parking along Laguna Canyon Road within the area will be temporarily closed.**

### WHEN

#### Anticipated Construction Schedule

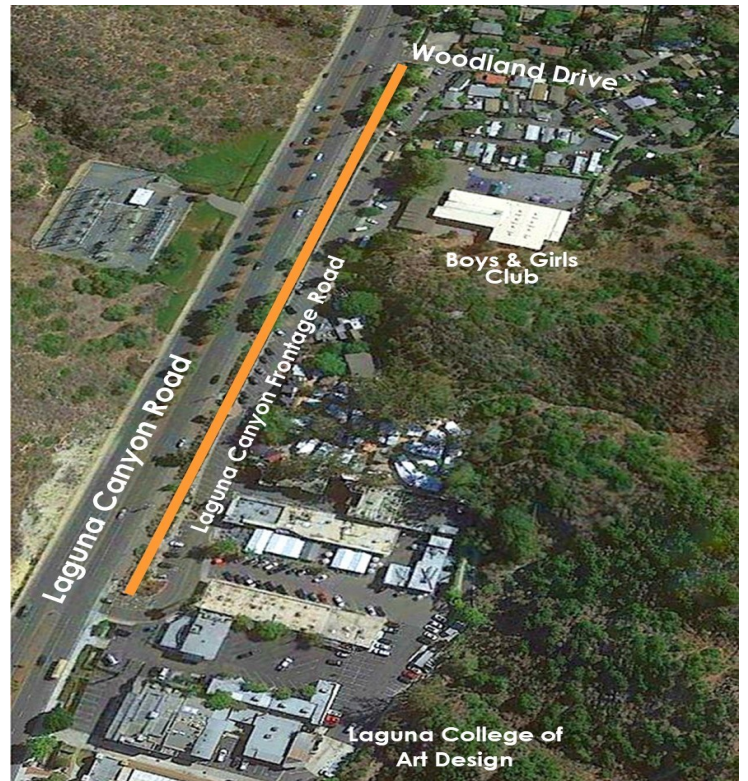

As early as September 6, 2022 through May 2023

Monday — Friday | 7:30 am — 6 pm

NOTE: Construction schedule is tentative and subject to change.

### WHERE

Channel located between Laguna Canyon Road and Laguna Canyon Frontage Road, from Woodland Drive to the southern end of Laguna Canyon Frontage Road
